Kansas Administrative Regulations

Department of Health and Environment

Article 35.—Radiation—Part 11. Wireline and Subsurface Tracer Studies.

28-35-359a. Radioactive contamination control.

(a) If the licensee detects any evidence that a sealed source has ruptured or that licensed materials have caused any contamination, the licensee shall immediately initiate the emergency procedures required by this part.

(b) If contamination results from the use of licensed materials in well logging, the licensee shall decontaminate all work areas, equipment, and unrestricted areas.

(c) During all efforts to recover a sealed source lodged in a well, the licensee shall continuously monitor, with an appropriate radiation-detection instrument or a logging tool with a radiation detector, the circulating fluids from the well, if any, to check for contamination resulting from damage to the sealed source.

(Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)
