Article 19.—Ambient Air Quality Standards and Air Pollution Control—General Regulations.

28-19-10. Circumvention of control regulations.

(A) No person shall cause or permit the installation or use of any machine, equipment, device or other article, or alter any process in any manner which, without resulting in a reduction of the total amount of contaminants emitted, conceals or dilutes the emission of contaminants which would otherwise violate provisions of these control regulations.

(B) Exception to section A of this regulation may be granted by the department, upon request, provided that such action is intended to convert the physical and/or chemical nature of the contaminant emission and that failure to reduce total contaminant emissions results solely from the introduction of contaminants which are not deemed to be detrimental to the public interest.
