

Kansas Administrative Regulations

Kansas Department of Agriculture—Division of Water Resources

Article 3.—Appropriation Rights

5-3-5b. Approval of application for water for the development of underground storage in mineralized formations.

In any case where it is not technologically and economically feasible to utilize poorer quality water for the development of underground storage in mineralized formations and fresh water must be used, the chief engineer shall require the construction of surface brine storage facilities to the extent economically and technologically feasible in an amount not to exceed forty percent (40%) of underground storage capacity of the applicant. This regulation does not exempt a person from complying with the requirements of other state and federal agencies relative to the construction of surface brine storage facilities.

(Authorized by K.S.A. 82a-706a and 82a-707(d); effective May 1, 1980.)
