

# **Kansas Administrative Regulations**

## **Kansas Department of Agriculture—Division of Animal Health**

### **Article 8.—Livestock Feed Lots**

#### **9-8-4. Drainage of feed lot.**

(1) Surfaces of feed lot pens shall be prepared and maintained at a grade or slope, and in a manner which will prevent future and eliminate present accumulations of surface waters, and which will permit and facilitate the immediate runoff of surface waters, from the feeding area.

(2) The surface waters running off, or being discharged from, the feeding area, shall be directed into storage reservoirs or settling basins, where practical and recommended, or shall be diverted and spread over fields, thus preventing the direct drainage and movement of solids being carried by water into draws, ravines, streams, and rivers.

(Authorized by K.S.A. 47-1505 and 47-1506; effective Jan. 1, 1966.)
