# Kansas Administrative Regulations

## Department of Health and Environment

### Article 35.—Radiation—Part 7. Special Requirements for Industrial Radiographic Operations.

**28-35-277a. Conducting industrial radiographic operations.**

(a) If radiography is performed at a location other than a permanent radiographic installation, the radiographer shall be accompanied by at least one other qualified radiographer or an individual who has at a minimum met the requirements specified in K.A.R. 28-35-289. The additional qualified individual shall observe the operations and shall be capable of providing immediate assistance to prevent unauthorized entry. Radiography shall not be performed if only one qualified individual is present.

(b) All radiographic operations shall be conducted in a permanent radiographic installation unless otherwise specifically authorized by the secretary.

(c) Except when physically impossible, collimators shall be used in industrial radiographic operations that use radiographic exposure devices that allow the source to be moved out of the device.

(d) Any licensee or registrant may conduct laybarge, offshore-platform, or underwater radiography only if the licensee's or registrant's procedures have been approved by the secretary, the nuclear regulatory commission, or another agreement state.

(Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)
