## **Department of Health and Environment**

### **Article 21.—Food, Drugs and Cosmetics**

#### **28-21-254. Equipment.**

(a) Equipment used for the manufacture, processing, packing, labeling, holding, testing, or control of amygdalin (laetrile) shall be maintained in a clean and orderly manner and shall be of suitable design, size, construction, and location to facilitate cleaning, maintenance, and operation for its intended purpose. The equipment shall: (1) Be so constructed that all surfaces that come into contact with the product shall not be reactive, additive, or absorptive so as to alter the safety, identity, strength, quality, or purity of amygdalin (laetrile) or its components beyond the official or other established requirements.

(2) Be so constructed that any substances required for operation of the equipment, such as lubricants or coolants, do not contact the product so as to alter the safety, identity, strength, quality, or purity of the substance or its components beyond the official or other established requirements.

(3) Be constructed and installed to facilitate adjustment, disassembly, cleaning and maintenance to assure the reliability of control procedures, uniformity of production, and exclusion from the product of contaminants from previous and current operations that might affect the safety, identity, strength, quality, or purity of amygdalin (laetrile) beyond the official or other established requirements.

(Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)
