

Kansas Administrative Regulations

Department of Health and Environment

Article 21.—Food, Drugs and Cosmetics

28-21-257. Product containers and their packaging materials.

(a) Suitable specifications, test methods, cleaning procedures, and, when indicated, sterilization procedures shall be used to assure that containers, closures, and other component parts of packages are suitable for their intended use. Product containers for amygdalin (laetrile) shall be cleansed with water which has been filtered through a non-fiber-releasing filter. Product containers and their components shall not be reactive, additive, or absorptive so as to alter the safety, identity, strength, quality, or purity of the product or its components beyond the official or established requirements and shall provide adequate protection against external factors that can cause deterioration or contamination of the product.

(Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)
