Kansas Administrative Regulations

Department of Health and Environment

Article 19.—Ambient Air Quality Standards and Air Pollution Control—Stack Height Requirements.

28-19-18. Stack heights.

(a) The degree of emission limitation required of any source for control of any air pollutant must not be affected by the portion of any source's stack height that exceeds good engineering practice or any other dispersion technique. The provision of these regulations shall not apply to stack heights in existence or dispersion techniques implemented on or before December 31, 1970, except where pollutants are being emitted from those stacks or using those dispersion techniques by sources as defined in these regulations, which were constructed or reconstructed or for which major modifications, as defined in the Kansas state implementation plan, were carried out after December 31, 1970.

(b) Good engineering practice for a stack height shall be determined in accordance with the provisions of K.A.R. 28-19-18a through 28-19-18f.

(Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1986; amended, T-88-2, Jan. 23, 1987; amended May 1, 1988.)
