

Kansas Administrative Regulations

Department of Health and Environment

Article 18.—Animal and Related Waste Control

28-18-14. Inspections.

(a) Each operator shall provide all necessary specialized equipment, clothing, or appurtenances to enable any authorized representative to enter a confined feeding facility for inspection.

(b) Each operator that develops or modifies animal health protocols and that requests KDHE conformance with the protocols shall submit a copy of the protocols to the department within 30 days of establishing or modifying the animal health protocols.

(c) Each operator shall allow any authorized representative following animal health protocols access to any confined feeding facility to conduct an inspection of the animal waste management system.

(d) Each operator shall allow any authorized representative access to conduct periodic inspections and review records at any confined feeding facility, scheduled as follows:

(1) For any confined feeding facility identified as having uncontrolled process wastes, every six months; or

(2) for any confined feeding facility not identified as having uncontrolled process wastes, at least once every five years if the confined feeding facility has a capacity of 300 or more animal units.

(Authorized by K.S.A. 65-170b and 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, 65-166a, 65-170b, 65-171d, and 65-171h; effective Jan. 15, 1999; amended March 16, 2007; amended Nov. 19, 2021.)
