

# **Kansas Administrative Regulations**

## **Department of Labor**

### **Article 50.—General Requirements for All Boilers**

#### **49-50-17. Steam cleaners and hot water power washers.**

(a) Each steam cleaner or hot water power washer in which water can flash into steam when released directly to the atmosphere through a manually operated nozzle, on which adequate controls and safety devices are installed, and on which safety relief valves are installed shall be subject to the boiler safety act if the cleaner or washer exceeds any of the limitations or conditions specified in section I, part PG-2.3 in the ASME boiler and pressure vessel code, which is adopted by reference in K.A.R. 49-45-1.

(b) Each steam cleaner and each hot water power washer subject to this regulation shall meet the requirements in "high-pressure cleaning machines," UL 1776, third edition, published on June 7, 2002 by underwriters laboratories, inc. and hereby adopted by reference, including the appendix.

(Authorized by K.S.A. 44-916; implementing K.S.A. 2005 Supp. 44-915; effective May 1, 1987; amended April 28, 2000; amended Nov. 3, 2006.)
