Kansas Administrative Regulations

Department of Health and Environment

Article 35.—Radiation—Part 3. Licensing of Sources of Radiation.

28-35-182c. Qualifications for a type B specific license of broad scope.

A type B specific license of broad scope shall be issued only to an applicant who has established controls and provisions relating to organization and management, procedures, recordkeeping, material control and accounting, and management review that are sufficient to ensure safe operation. These controls and provisions shall include the following:

(a) The appointment of a radiation safety officer who is qualified by training and experience in radiation protection and who is available for advice and assistance on radiation safety matters; and

(b) the establishment of appropriate administrative procedures. These procedures shall ensure that all of the following conditions are met:

(1) The procurement and use of radioactive material are controlled.

(2) Safety evaluations of proposed uses of radioactive material are completed. These evaluations shall take into consideration the adequacy of facilities and equipment, training and experience of the user, and proper operating or handling procedures.

(3) Before use of the radioactive material, the safety evaluation of proposed uses, prepared in accordance with paragraph (b)(2), is reviewed, approved, and recorded by the radiation safety officer.

(Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended July 27, 2007.)
